ADVANCED SINGLE-SIDED  
LIQUIDITY DEX BUILT ON NEAR  
PROTOCOL

# Advanced DEX Built on NEAR Protocol

---

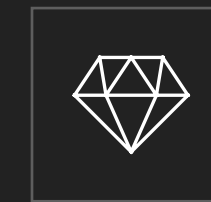

We are building a powerful multichain DEX on NEAR Protocol, a secure and highly scalable Layer-1 blockchain ecosystem with immense potential that will help us set new standards in the DEX space.

Secure well understood blockchain that supports RUST

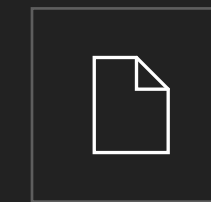

Enough dApps to give us a codebase for basic action

Predictable low transaction fees

Energy-efficient Proof-of-Stake Consensus

Vibrant Smart Contracts Platform

Veax is an advanced single-sided liquidity DEX built on NEAR Protocol. The platform offers a variety of features that improves liquidity management on NEAR.

#### **ADVANCED LIQUIDITY MANAGEMENT**

Liquidity management reduces complexity for passive investors particularly keeping concentrated liquidity active.

#### **ADAPTABLE EXCHANGE POOLS**

Allows different AMM matching algorithms to coexist in a single liquidity pool with variable fee levels.

#### **SINGLE-SIDED LIQUIDITY**

Our adaptable liquidity pools will support single-sided liquidity, giving the liquidity provider the maximum opportunity to participate.

#### **ORDERBOOK UX**

Orderbooks, charting, trade reports, the goal of our implementation is to make the transition to using DEX from CEX as user friendly as possible.

#### **UNLOCKING LIQUIDITY**

Leaning on our decades of trading experience before the inception of cryptocurrency, we apply best in class implied prices calculators to support smart order routing.

# Veax Testnet: Massive Engagement. Traders Love The Product.

## VEAX TESTNET STATS

↘  
**12,230**  
unique accounts  
participated

↘  
**120,861**  
liquidity pool positions  
created

↘  
**415,055**  
testnet transactions

↘  
**1,903,000**  
native NEAR transactions

**Note:** The above data is for the first 69 days of the Veax Testnet, launched on 31 January 2023.

Wow this is, I am one of the first people who tried your product in the testnet phase, I am very happy, the design and graphics are neat and smooth, transactions are fast.

- Aji Feriansyah

Nice work people. I am very happy with the testnet. This project is better than other DEX platforms.

- Malyk Oleksandr

UI/UX looks awesome!

- Ayush

Very nice UI. Easy to use features and everything is smooth. Fast transaction processing and low fees.

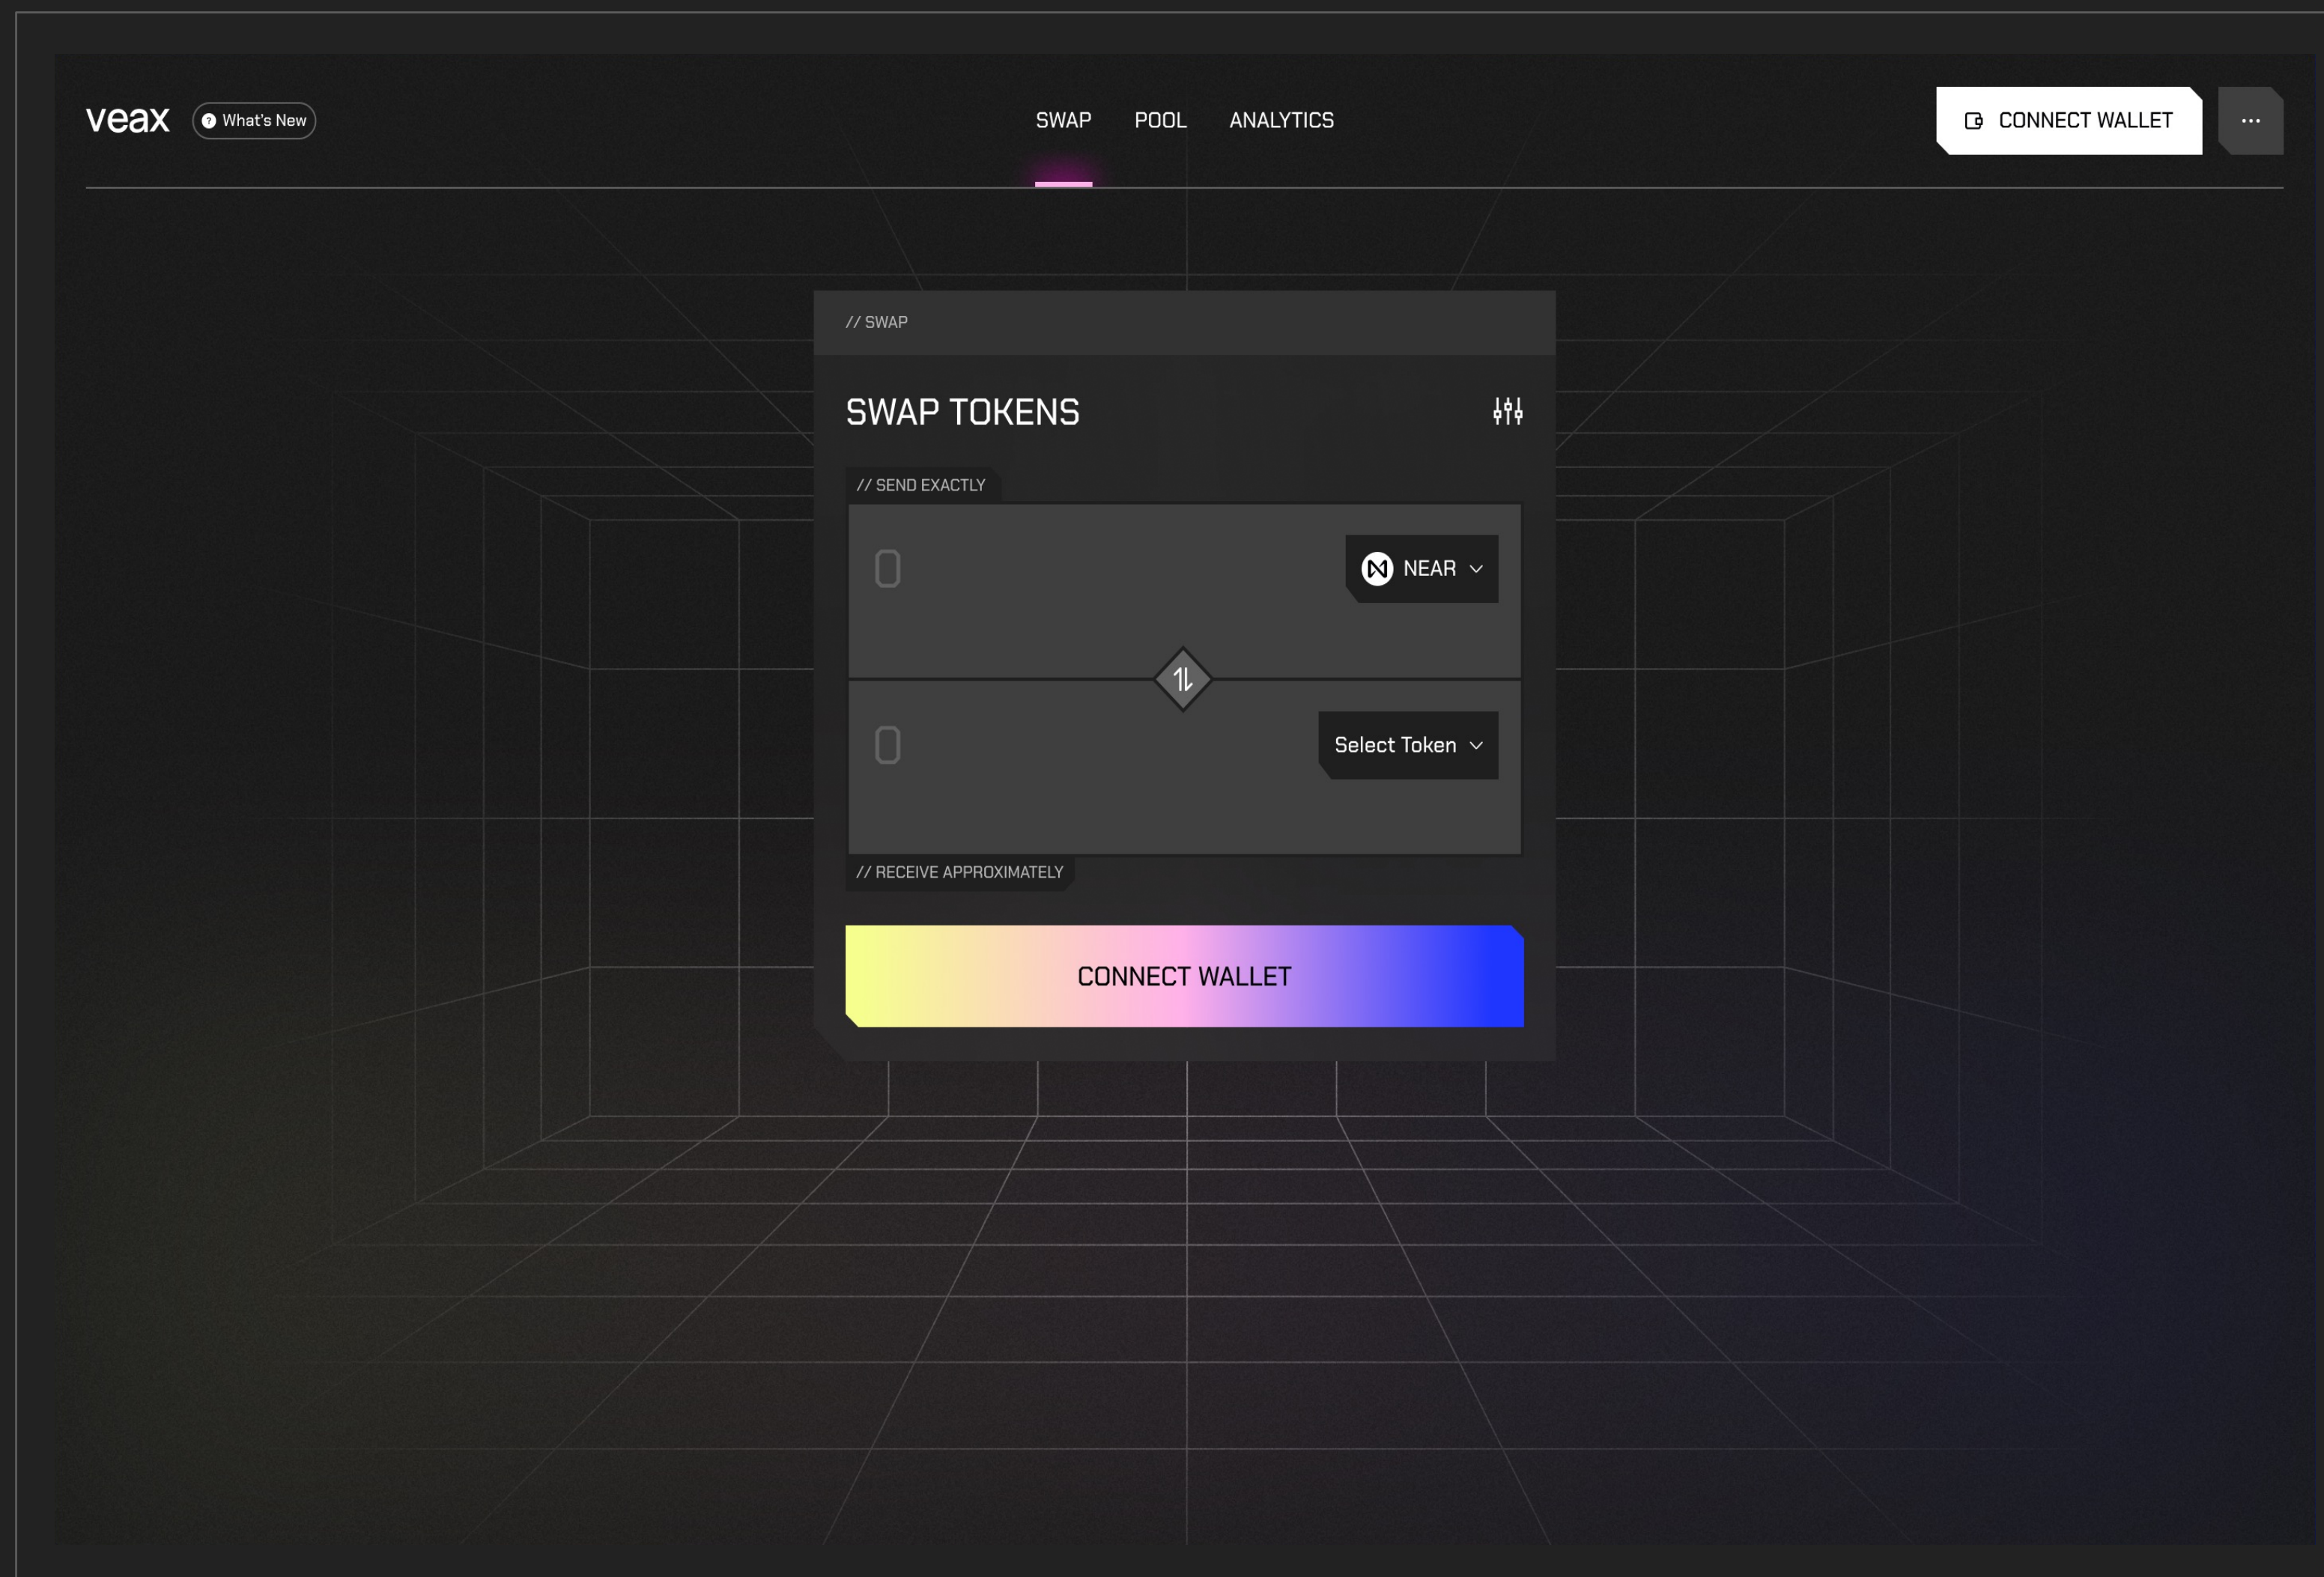

- Calmlet

Testnet runs flawlessly with no issues which means all features have been tested as they should be. It's been an amazing experience with the team, community and everyone involved in this project!

- Sayhke

# PRODUCT IMAGES – SWAP SCREEN

# PRODUCT IMAGES – ADDING LIQUIDITY

The screenshot displays the 'ADD LIQUIDITY' interface on the Veax platform. The interface is organized into several sections:

- Header:** Includes the 'veax' logo, a 'What's New' notification, and navigation tabs for 'SWAP', 'LIQUIDITY', and 'ANALYTICS'. A balance indicator shows '102.1 M NEAR / 0xB0A2...44F5'.
- Pool Selection:** 'SELECT EXCHANGE POOL' section with dropdowns for 'NEAR' and 'USDC'. The 'SPOT PRICE' is listed as '31.459,881 USDC per wNEAR'.
- Fee Selection:** 'SELECT FEE LEVEL' section with a fee range from 0.01% to 1.28%. The 0.16% level is selected, with a note that '54% OF USERS SELECT 0.16% LEVEL'. A visual distribution chart shows the 54% selection point.
- Price Range:** 'SELECT PRICE RANGE' section with 'Concentrated liquidity' as the position type. It features a 'USDC / NEAR liquidity distribution' histogram. A tooltip for the 0.01% fee level shows it represents 34.005% of liquidity. The 'MIN PRICE' and 'MAX PRICE' are both set to '15.250 USDC per NEAR'.
- Deposit Amount:** 'DEPOSIT AMOUNT' section showing a deposit of '55.054,33 NEAR' with a balance of '120.47' and a total value of '\$5546.001'.
- Transaction Details:** 'TRANSACTION DETAILS' section listing 'Added NEAR' (4.87-5.33), 'Added USDC' (0), 'Admissible spot price' (34.899-35.171), and 'Storage fee / Gas fee' (0.15 / 0.22).
- Confirmation:** A large 'CONFIRM ADDING LIQUIDITY' button at the bottom.

## MATHIAS LUNDOE NIELSEN

Co-Founder, Chief Executive Officer

---

Mathias is a seasoned, award-winning tech entrepreneur and investor with a deep knowledge in crypto, blockchain, travel tech, fundraising and capital management.

---

Favored lecturer on notable tech conferences such as Blockchain Summit London, ITU, and TEDx. Mathias is currently also serving as the Group CEO at Tacans AG, a Swiss-based blockchain development firm and venture builder.

## JAMES DAVIES

Co-Founder, Chief Product Officer

---

James is ex CFO at Crypterium, CIO at Coindirect, Group COO & Chairman at London Derivatives Exchange.

---

20+ years in Fintech, from Dot Com to Crypto. Experienced in a variety of C-suite roles, strong tech background with direct oversight of development in many roles.

---

Oversight of compliance in regulated businesses, political lobbying, legal function, patents, finance functions, development, QA, product management, support, dev ops, PR, marketing, sales, business development, as well as running strategy sessions and capital raising.

## IVAN IVASHCHENKO

Chief Technology Officer

---

Ivan is ex-chief architect at Bitfury, where he led the development of both the private and public, permissionless Exonum blockchain and he is an active participant in the Rust open-source community, he has mentored a large number of blockchain and systems engineers and has been responsible for building blockchain ecosystems from the core to end solutions as a contributor in various projects.

---

Ivan is a highly experienced solution architect and principal engineer with more than 11 years of experience. Focusing on innovative, large-scale products, he has designed, implemented and delivered reliable and efficient solutions for a number of large projects. His main areas of expertise are cryptographic and blockchain protocols, consensus algorithms, fault-tolerance distributed systems and building reliable software.

## MARIE TATIBOUET

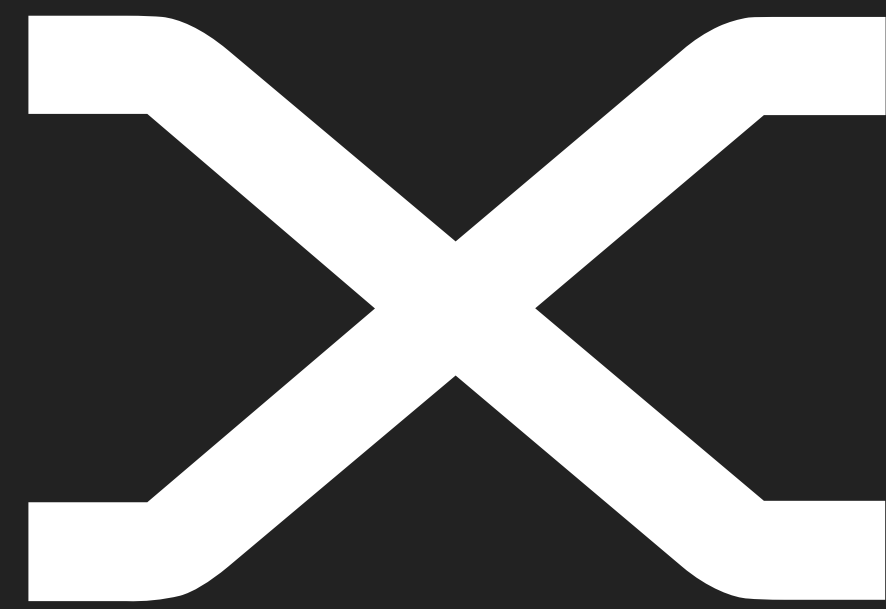

Chief Marketing Officer

---

Prior to joining Tacans Labs, she was the CMO at Gate.io, one of the world's top cryptocurrency exchanges. With over 10 years occupying various marketing roles, and 5 years in blockchain tech, her experience building and executing marketing strategies, teams and communities takes projects she engages with to the next level.

---

“It’s my job to help spread the word about our Tacans Labs and the values it espouses innovation, transparency, and integrity. I also see it as my personal mission to help educate people around the world about blockchain technology and how they might use it to change the world.”
